Video Overlay and Crosshair Generator

Engineered for Road Marking

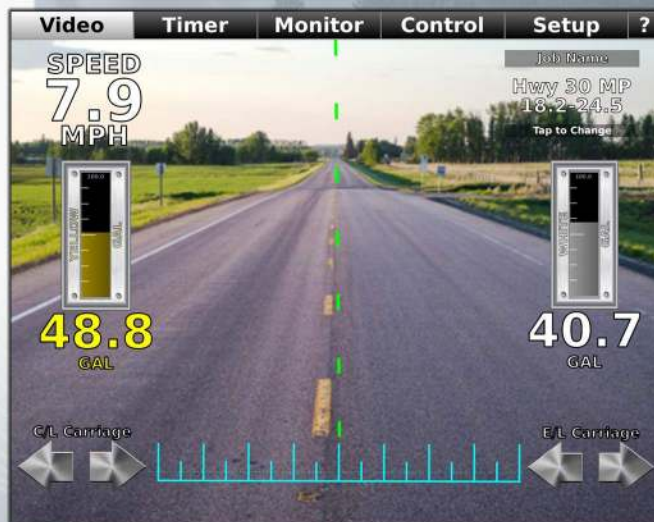

The CVO-312 delivers advanced video guidance and real-time application rate information directly to the road marking vehicle driver. Easily overlay color crosshairs, vehicle speed, and other key operating information on live video feeds to reduce driver load and promote safer driving.

The CVO-312 is capable of receiving operating information from a DL-09 Data Logger or most Skip-Line control systems.

Features

- Promotes Safety
- Large Digit Speed Display
- Reduces Driver Load
- Fully Configurable Crosshairs
- Integrates Multiple Devices
- Increases Application Quality
- Touchscreen Interface
- Four Camera Inputs
