

Basic Controllers

MST-02 Mini Skip Timer

THE MST-02 Mini Skip Timer is the most economical miniature controller in the road marking market. It provides straightforward control of four (or fewer) paint guns. It also features built-in distance and pump stroke counters. The MST-02 is ideal for one-man operation and smaller striping vehicles.

The MST-02 Mini Skip Timer features:

- Four Paint Gun Outputs
- Four Bead Gun Outputs
- Single Output Cable
- Speed Display
- AutoCycle Feature with Advance/Retard Switch
- Gun Time Delay & Distance Offsets
- High Temperature Backlit LCD Display

SG-10 Grinder Controller

The SG-10 is a simple grinder controller for road marking removal, rumble strip grinding, and plunge grinding. Using an intuitive menu, an operator can easily set the SG-10 to grind skip patterns to minimize equipment wear and increase productivity.

The SG-10 Grinder Controller features:

- Groove Resolution to 1/10th Ft.
- High Temperature Backlit LCD Display
- Distance, Odometer, and Grind Stroke Counters
- Stores Settings
- Compatible with +12V or +24V DC Power
- Raises and Lowers Grinding Head
